

## **Don Gulliford Catches Possible World Record Rainbow in Lake Washington**

2-13-09 Fortunately Jim Dykeman was summoned by Sharon to photo the Washington State and probably world record rainbow, taken in East Channel right in front of the M.I. Beach Club docks, starting in late afternoon with battle continuing into the early evening. WDFW analysis still continuing on scales, otoliths (ear bones) and some sort of fish DNA to eliminate possibility of some "mutant" Lake Washington living (as in Lake Chelan) king salmon. This better get me not only platinum WFFC pin but part of stimulus \$\$\$\$\$. Nearly broke the WSDA certified scales at QFC at 44.6 lbs. Have to run; press & various stringers and agents at the front door.....Don Gulliford
